MISSION STATEMENT OF THE UNIVERSITY OF DEBRECEN FACULTY OF HEALTH

As a significant institution of Hungarian health and social higher education, the University of Debrecen Faculty of Health contributes to the development of universal science and the labor market needs of the health and social sphere with high-level, modern, versatile interdisciplinary training, research and development. This mission is fulfilled by the lecturers, staff and students of the faculty together, as a commitment to quality management, in cooperation with domestic and international partners, keeping the needs of employers in mind.

To achieve our goals:

- taking European processes and meeting societal needs into account, the faculty intends to **issue** 21st century **qualified professionals** by developing and implementing multi-cycle training (BSc, MSc, BA, MA) programs, by expanding higher vocational training, by the diversity of postgraduate training, through continuous training and the use of distance learning, also in view of the need for lifelong learning,
- we strive to strengthen and **develop** in our teachers, staff, students **the skills** that are crucial in responding to the challenges of our time, such as appropriate expertise, humanism, empathy, social sensitivity, collegiality, professionalism, independence, critical thinking, commitment ability to cooperate and lead,
- striving for efficiency, flexibility, increasing responsiveness, dynamic development, rationalization of management in order to raise the quality level of **education** and **research**, we help the professional development and individual well-being of **our teachers** and **employees** by continuously improving the conditions, providing an appropriate perspective,
- we solve our tasks in cooperation with the professional organizations, institutions and institutes of the health and social sphere, with the outstanding participants of other fields involved in the training, thus creating the possibility of continuous adaptation to the changing requirements and professional development,
- using our international relations, we strive to expand our research activities, meet training requirements at a high level, increase the efficiency and flexibility of teaching and research techniques, optimize their effectiveness, and support cross-border initiatives. Using the intellectual support of the university, we strive to become one of the intellectual centers of the Northern Great Plain region.
