THE QUALITY POLICY STATEMENT OF THE UNIVERSITY OF DEBRECEN FACULTY OF HEALTH

The University of Debrecen Faculty of Health is a key institution in the region in terms of health and social higher education, also in terms of certain majors, nationwide.

The goal of the faculty, heads of departments, lecturers and staff is to make both graduates and employers satisfied with their service. It seeks to achieve this goal through the effective participation of all its employees, close contact with the health and social institutions participating in the practical training and the employees of the graduated students, and a commitment to the continuous improvement of the quality of education.

In accordance with the mission statement of the faculty, the management of the faculty declares its commitment to the application of a modern management method. It widely applies modern management methods; the regulated management and continuous development of education and research in order to improve the satisfaction of those involved in these processes.

In order to achieve the goals, the management considers it important to:

1. the employment of employees with outstanding knowledge, the provision of working conditions, from the technical, occupational health and human resources point of view, so that our teachers and employees can carry out their activities to the best of their knowledge,
2. encouraging training and further training,
3. recognition of quality work,
4. providing a forum for the reception of quality improvement initiatives, their substantive evaluation,
5. ensuring the opportunity for students, employees and employers to express meaningful opinions, taking them into account during quality improvement measures,
6. the optimal use of resources,
7. the operation of a modern information and communication system.

In accordance with the quality policy statement of the University of Debrecen, by declaring the faculty's quality policy, the leaders of the University of Debrecen Faculty of Health declare their responsibility and intention to establish and maintain their own modern quality management system, continuously evaluate and improve it and ensure conditions to operate it. The management of the faculty ensures and widely acknowledges that quality performance is the key to the success of the institution and the personal well-being of the students and staff.
